

Captioning on television has changed my life. Prior to having captioned programs, I simply did not watch TV. This prevented me from experiencing both educational and enjoyable family time. I am one of 26 million + Americans who are partially deaf. One does not need to be Deaf to experience a barrier to understanding. Captioning can only improve as the technology advances. Please know how important this technology is to those of us who do not hear well. Note: It would be helpful if local newscasts including live interviews would be captioned. Also, the weather info. There is much to be thankful for, but much more to hope for. Thank you.
